

Building Stronger Workers

PAIN CLINIC

myoActivation® Treatment

A **Drug Free Solution** To Worker Pain

Direct Impact On High-Risk Workforce

96%

Reported improved mobility & function

89%

Reported reduced physical tension/pain

40%

Avoided sick leave and stayed at work

CIRP Data 2024

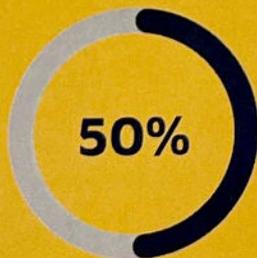

All workers reported a **reduction in pain** - exceeding the threshold for clinical significance. Almost half of all workers reported a reduction in anxiety and depression as a knock-on effect of lowered or no pain

CLIENT TESTIMONIALS:

"When I started with CIRP, I was in a dark place. The counselling, bed-based treatment, WRS Group, and especially the Opioid-Free Pain Clinic changed my life. I thought I was doomed, but the care I received... gave me my life back. Before CIRP, I didn't want to live. Now, with my pain mostly gone and my mobility restored, I finally feel human again. If help is available, take it. CIRP helped me reclaim my life, and I'm so grateful."
