

South Island PCN Clinical Pharmacist

Services to FPs and NPs

A primary care clinical pharmacist (PCCP) collaborates with patients and the primary care team to identify and resolve actual and potential drug therapy problems through comprehensive medication management. The PCCP, along with the primary care team, optimizes drug therapy outcomes for the patient.

Services to Patients

- Education about medications and identifying drug therapy problems
- Focus on health goals and barriers to adherence
- Initial 60-minute appointment with pharmacist

Eligibility Criteria

- Adult patients (age 19+) who could benefit from these services
- Willing to be seen in-person, by phone or virtually
- Attached to a Family Physician or Nurse Practitioner

Who to Refer

Adult patients (19+) experiencing any of the following:

- Multiple drug therapies, health conditions, or chronic diseases
- Polypharmacy concerns, sub-optimal drug therapy outcomes or adverse reactions
- Complex or costly drug therapies
- Recent discharge from hospital with newly prescribed medications

How to Refer

Within your EMR, task a referral to your Clinical Pharmacist. Please include the reason for the referral. MOA books the initial appointment and the Pharmacist books the follow up appointments.
